

REDCAP

Gold Sponsor

Red Cap Energy has been a leader in the South African renewable energy industry since inception with CEO Mark Tanton honoured with a Wind Industry Pioneer award. Red Cap has also pioneered the participation of local communities in wind projects by enabling the local Kouga community to own 26% of its first wind farm. Our highly skilled team covers the full range of development activities, including land acquisition, site engineering, project finance, stakeholder engagement and overseeing plant construction and operation.

“Established in 2009, Red Cap is 100% proudly South African and aims to be one of the key drivers in the country’s Just Energy Transition as it accelerates away from carbon-intensive power production to a sustainable energy future. Our projects are also structured to provide transformative long-term socio-economic benefits to local communities.”

Mark Tanton: CEO

Kouga Wind Farm 80MW

Eastern Cape

The Kouga Wind Farm can generate approximately 300GWh of clean electrical energy per year, equivalent to the annual consumption needs of approximately 50000 average households, while avoiding the emission of over 290000 tonnes of CO₂ into the atmosphere annually. The local community is a significant shareholder in the project owning 26% of the wind farm.

Gibson Bay Wind Farm 111MW

Eastern Cape

In line with Red Cap’s desire to ensure that communities are truly uplifted by their projects, the local community owns 40% of the Gibson Bay Wind Farm. The Gibson Bay Wind Farm can generate around 420 GWh per year, equivalent to the annual consumption needs of around 131000 South African households while avoiding the emission of over 383000 tonnes of CO₂ into the atmosphere each year.
